Guide: choosing your first online course

Équipe L’Akadémie · 2026-10-08

Eight categories, three levels: how to find your way among the free courses.

Our online courses are free and need no account, in eight categories: Cyber Portal, AI, development and production, infrastructure, ISMS, management, marketing and communication.

How to choose

- **Beginner**: start with an introduction course (AI, ISMS, management, marketing, communication) or with HTML.
- **Intermediate**: Node.js, Docker, Kubernetes, Terraform and Ansible.
- **Practise**: the infrastructure hands-on labs and the Cyber Portal laboratories.

In each course, use the search to find a specific concept.
